

# ROBIN SINGH

Senior Full Stack Engineer — Node.js • TypeScript • Stripe • AWS • OpenAI APIs • Redis

+91-8168526098 | Mohali, India | [robysingh@gmail.com](mailto:robysingh@gmail.com) | [LinkedIn](#)

## PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 4+ years of experience building scalable FinTech payment platforms and AI-powered backend systems across two B2B products — Credee (payment financing) and Practina (AI social media automation). Strong expertise in Node.js, TypeScript, React, Angular, PostgreSQL, Redis, AWS, Docker, CI/CD, and Stripe Connect. Delivered payment infrastructure, background job systems, API optimization, automation workflows, and production monitoring across high-growth products. Reduced API P99 latency by 60%, improved release cycles by 65%, and automated reconciliation workflows saving 20+ hours monthly. Owns engineering end to end: system design, production infrastructure, and on-time cross-functional delivery.

## TECHNICAL SKILLS

|                     |                                                                                                                   |
|---------------------|-------------------------------------------------------------------------------------------------------------------|
| Languages           | Python, TypeScript, JavaScript, SQL                                                                               |
| Frontend            | React.js, Angular, RxJS, TypeScript                                                                               |
| Backend             | Node.js, Express.js, REST APIs, Microservices, Webhooks, JWT, OAuth, API Security, Rate Limiting                  |
| Databases & Caching | PostgreSQL, MySQL, MongoDB, Redis                                                                                 |
| Async & Messaging   | BullMQ, Redis Queues, Message Brokers, DLQ Handling, Event Orchestration                                          |
| Cloud & DevOps      | AWS (EC2, S3, Lambda), Docker, Kubernetes, Jenkins, CI/CD, Nginx, PM2, Linux                                      |
| Payments & FinTech  | Stripe Connect, Terminal S700, OBO Flows, Payouts, Refunds, Installment Plans, Ledger Reconciliation, Reports API |
| AI & Integrations   | OpenAI, Prompt Engineering, Meta Ads API, Google Ads API, Socket.IO, FFmpeg, Puppeteer                            |
| System Design       | Event-Driven Architecture, API Design, Idempotency Patterns, Background Processing, Scalability                   |
| Observability       | Grafana, New Relic, Prometheus, Zabbix, Distributed Tracing, Performance Alerting                                 |

## EXPERIENCE

### Bridging Technologies Pvt. Ltd.

Oct 2021 – Present — Mohali, India

Product-based company building B2B FinTech payment infrastructure and AI-powered backend systems

#### Senior Full Stack Developer

Oct 2025 – Present

Credee • Stripe Connect-powered B2B payment financing platform

- **Payment Plan Infrastructure:** Engineered a Node.js and TypeScript financing engine with configurable installment schedules, interest tiers, and credit-score-based eligibility checks for pre-approved customer financing.
- **Stripe Connect & OBO Flows:** Implemented Stripe Connect OBO payment flows with webhooks, payout orchestration, platform fees, and automated transfer reconciliation across 1,000+ merchants.
- **Terminal S700 Integration:** Integrated Stripe Terminal S700 with backend payment intents, reader management, webhook handling, and real-time transaction updates.
- **Idempotency & Reliability:** Implemented idempotent payment workflows to prevent duplicate charges and automated Stripe ledger reporting, saving 20+ hours of manual reconciliation monthly.
- **Async Processing at Scale:** Architected Node.js, Redis, and BullMQ pipelines processing hundreds of thousands of daily jobs with retries, DLQ recovery, and 99.9% event delivery reliability.
- **Performance Engineering:** Optimized PostgreSQL, MySQL, and Redis performance through indexing, caching, and query tuning, reducing API P99 latency by 60% and database CPU utilization by 35%.
- **Testing & Quality:** Established Jest-based unit testing for payment calculation logic and webhook handlers, ensuring correctness of critical financial flows and preventing regressions.
- **Engineering Leadership:** Led sprint planning, architecture reviews, and cross-functional delivery across a team of 10 engineers; mentored 2 junior developers through structured code reviews and technical guidance.

#### Full Stack Developer

Oct 2021 – Oct 2025

Practina • AI-powered social media, advertising, and reputation management platform

- **AI Content Pipeline:** Integrated OpenAI and Python automation for social posts, review responses, and campaign copy, increasing engagement by 40% and saving 15+ hours weekly.
- **Social & Ads Automation:** Created REST and event-driven APIs for multi-platform publishing, Meta Ads, and Google Ads automation, supporting campaign creation, management, and performance tracking workflows.
- **Media Processing:** Designed an FFmpeg and AWS S3 media pipeline, cutting processing time by 50% and reducing storage usage by 30%.

- **AI Workflow Automation:** Designed and deployed Python-based OpenAI workflows to automate email template personalization, send-time decisioning, customer review sentiment analysis, and follow-up recommendations.
- **Real-Time Systems:** Built Socket.IO-based tracking and notifications, improving transaction visibility and reducing support escalations.
- **Frontend Development:** Delivered Angular, React.js, and TypeScript dashboards for campaign analytics, lead management, and reputation monitoring across core product workflows.
- **Cloud & CI/CD:** Managed AWS, Docker, and Jenkins CI/CD pipelines, reducing release time by 65% and enabling zero-downtime deployments.
- **Observability:** Deployed Grafana and New Relic monitoring with alerting, reducing production MTTR by 50%.

RECOGNITION

---

- **Star Performer Award, 2026:** Recognised by leadership for technical ownership, consistent delivery of business-critical features, and driving cross-functional engineering initiatives.
- **Star Player of the Department, 2023:** Awarded for technical excellence, platform reliability improvements, and cross-functional collaboration.
